

BHARGAVA BHAVARAJU

AI-Enabled Operations & Automation Analyst

bhargava.bhavaraju@gmail.com | +91 9910569333 | Delhi, India | [linkedin.com/in/bhargava-bhavaraju/](https://www.linkedin.com/in/bhargava-bhavaraju/) | [somerandomintrovert.github.io/bhargavabhavaraju/](https://github.com/somerandomintrovert/bhargavabhavaraju/)

SUMMARY

Business Operations & Analytics professional with ~3 years' experience designing and deploying AI-driven automation solutions that eliminate manual work and improve operational performance. Led end-to-end delivery of an AI knowledge-retrieval copilot (95% reduction in retrieval time) and a hybrid fraud/spam detection framework (accuracy improved from 72% to 92%, preventing \$12K+ in losses), alongside SQL-driven SLA reporting automation (93% reduction in reporting cycle time). Certified in n8n (Level 2 Advanced) and Google AI, with hands-on experience across SQL, Power BI, Snowflake, Power Automate, and multi-LLM tooling (ChatGPT, Claude, Gemini, Perplexity, Copilot). Selected for an internal AI initiative team to identify cross-functional process gaps and design automation solutions; currently pursuing a Microsoft AI Product Management course to sharpen requirements-scoping and solution-design skills.

CORE SKILLS

AI & Automation: n8n (Level 2 Advanced Certified), Microsoft Power Automate, NotebookLM, Microsoft Copilot, ChatGPT, Claude, Gemini, Perplexity, Prompt Engineering, AI Workflow Design, API Integrations, LLM Applications

Analytics & Reporting: SQL, Snowflake, Power BI, Tableau, Looker Studio, GA4, Advanced Excel (VBA/Macros), Dashboard Development, KPI Tracking, SLA/TAT Monitoring

Operations & Process Improvement: Workflow Optimization, Process Automation, Root-Cause & Bottleneck Analysis, SOP Design, Cross-Functional Stakeholder Management, Documentation & Knowledge Management

Platforms & Collaboration Tools: Power Apps, Monday.com, Jira, Confluence, Microsoft Teams, Outlook

Programming: Python, R, IBM SPSS

PROFESSIONAL EXPERIENCE

Analytics & Operations Associate

Aug 2024 – May 2026

G2 (formerly Gartner Digital Markets, post-acquisition)

Gurugram, India

Transitioned to G2 in February 2026 following G2's acquisition of Gartner Digital Markets, retaining the same role and responsibilities.

- Owned end-to-end operational reporting and SLA monitoring for a high-volume review operations function, identifying process bottlenecks and driving automation initiatives that materially reduced manual reporting effort.
- Partnered with cross-functional stakeholders to redesign operational workflows using SQL, AI-powered automation, and standardized documentation, improving process efficiency and supporting team-wide knowledge management.
- Selected for an internal AI initiative team to identify operational and process gaps across the organization and design AI-driven automation solutions to close them.
- Facilitated internal AI adoption workshops and upskilling sessions to accelerate team-wide adoption of AI-assisted operational workflows.

Key AI & Automation Projects

- Led the end-to-end design, build, and rollout of Reviora, an AI-powered operations copilot built on NotebookLM that centralized organizational knowledge into a searchable assistant — reducing knowledge retrieval time by 95% and recovering 5–6 productive days per month across the team.
- Led the end-to-end design and deployment of a hybrid fraud and spam detection framework combining SQL-driven rule automation with AI-assisted review logic, improving detection accuracy from 72% to 92% and preventing \$12K+ in operational losses.
- Built and automated a SQL-driven SLA/TAT intelligence tool with real-time dashboards, reducing daily SLA reporting effort by 93% (from ~15 minutes to under 1 minute).
- Designed an Automated Note Generator using structured templates and AI-assisted analysis, cutting per-record documentation time by 93% and standardizing operational outputs across the team.
- Built six custom AI personas across ChatGPT, Claude, Gemini, and Perplexity with tailored instructions to standardize analytical workflows, documentation, and anomaly detection across the team.

- Automated repetitive reporting tasks (including report template standardization) using VBA/Macros, and managed reporting workflows using data queried from Snowflake.
- Managed team reporting and workflow tracking through Monday.com to support operational visibility and delivery cadence.

Market Research Associate

Jul 2023 – Feb 2024

Delvens

Noida, India

- Owned end-to-end market research and competitive intelligence projects across multiple industries, translating primary and secondary research into actionable, decision-ready insights for clients.
- Applied structured analytical frameworks (Porter's Five Forces, PESTLE, SWOT, benchmarking) to support market entry and competitive-positioning engagements, identifying growth opportunities and emerging risks.
- Used SQL, R, SPSS, and Tableau to analyze complex datasets, automate recurring research workflows, and convert raw data into executive-ready reporting.
- Redesigned data collection and reporting workflows, reducing processing time by 45 minutes per cycle and reporting turnaround by 20 minutes, while improving accuracy and consistency.
- Achieved the team's highest report-closure rate, contributing to a 50% increase in individual productivity and a 40% increase in lead generation through streamlined research operations.

CERTIFICATIONS

- Google AI Professional Certificate — Google, May 2026
- n8n Level 2: Advanced Course — n8n, May 2026
- Google Data Analytics Professional Certificate — Google, April 2024
- Microsoft AI Product Management Course — Microsoft, In Progress

EDUCATION

Master of Arts (MA), Clinical Psychology

May 2022

Amity University, Noida, India

Bachelor of Science (BS), Microbiology, Honors

May 2020

Amity University, Noida, India

ACHIEVEMENTS & PUBLICATIONS

- Awarded Top Performer recognition within the team at Gartner for outstanding contributions to operational efficiency and analytical excellence.
- Publication: "Emotional Competence and Altruism among Young Adults in India" — International Journal of Recent Advances in Multidisciplinary Topics, November 2022 (empirical behavioral research using quantitative methods).
