Summary

AI-Driven Operations & Analytics Professional with 3+ years optimizing business processes through data, automation, and AI. Track record includes reducing manual effort by up to 93%, increasing productivity by 50%, and preventing \$12K+ in operational losses through AI-driven risk detection. Skilled in SQL, Python, Tableau, prompt engineering, and end-to-end workflow automation.

Professional Experience

Product Reviews Associate (Analytics & Operations)

August 2024 – May 2026

Gartner Digital Markets (Gartner) → G2(Post-Acquisition)

Gurugram, India

Transitioned to G2 in February 2026 following G2's acquisition of Gartner Digital Markets, retaining the same role and responsibilities.

- Reviewed and validated software and service reviews submitted by industry experts and end users for authenticity, accuracy, and policy compliance — the core operational function underpinning the initiatives below.
- Built "Reviora," an AI operations copilot on NotebookLM that consolidated the team's entire knowledge base into a conversational, always-available resource — reducing knowledge retrieval overhead by **95%** and recovering **5-6 days** of productive time monthly.
- Designed a hybrid spam and fraud detection system combining SQL workflows, formula-based automation, and AI-assisted prompting — lifting detection accuracy from **72% to 92%** eliminating manual review as the primary mechanism and preventing operational losses exceeding \$12K through early detection of sophisticated spam networks.
- Built the TAT Intelligence Tool, a two-layer system automating SLA breach detection and introducing real-time performance tracking — cutting daily reporting time by **93%** (15 min → under 1 min).
- Developed an Automated Note Generator using formula-driven templates to auto-analyze raw data and produce standardized notes — cutting per-record processing time by **93%** (15 min → under 1 min) and standardizing output team-wide.
- Designed and deployed a suite of six purpose-built AI personas calibrated to organizational context — adopted team-wide, replacing individual judgment with consistent, repeatable workflows across analysis, documentation, and irregularity detection.
- Founded and led cross-functional initiatives beyond core responsibilities — including AI adoption and upskilling sessions on AI-driven workflows, and a team Wellness Initiative built from inception to support employee wellbeing through psychology-informed engagement programs.

Market Research Associate

July 2023 – February 2024

Delvens

Noida, India

- Spearheaded strategic and market intelligence initiatives by conducting Porter's Five Forces, PESTLE, SWOT, DROC, M&A, and competitive benchmarking analyses using primary and secondary research methodologies to support business decision-making.
- Leveraged SQL, R, SPSS, Tableau, and advanced spreadsheet modeling to execute market sizing, forecasting, segmentation, and geographical market share analyses, transforming complex datasets into actionable insights for stakeholders.
- Developed data-driven market reports, dashboards, and analytical frameworks across multiple domains, enabling leadership teams to identify growth opportunities, market trends, and competitive advantages.
- Designed and optimized surveys, stakeholder interviews, and research methodologies using Google Forms, Typeform, MS Office Suite, and SPSS, ensuring high data integrity and analytical precision.
- Managed end-to-end research and analytics projects in fast-paced environments while consistently meeting timelines and stakeholder expectations.
- Achieved the highest report closure rate within the team, increasing productivity by **50%**.
- Architected advanced data collection and analytical methodologies that reduced processing time by **45 minutes** while improving operational accuracy.
- Revamped reporting structures and workflows, cutting processing time by **20 minutes** and increasing lead generation by **40%**.
- Streamlined research and reporting operations through automation-driven solutions, accelerating turnaround times and improving scalability.

- Recognized for consistently delivering high-quality insights under demanding timelines with strong analytical rigor and stakeholder satisfaction.

Skills

- **Core Competencies:** Data Analytics, Business Analytics, Market Research, Data Visualization, Dashboard Development, Reporting & Insight Generation, KPI Tracking, Forecasting & Trend Analysis, Statistical Analysis, Artificial Intelligence (AI), Business Intelligence (BI), Operational Analytics, Workflow Optimization, Process Automation, Strategic Data Analysis, Competitive Intelligence, AI Workflow Design, Prompt Engineering.
- **Tools & Technologies:** SQL, Python, R, Tableau, Power BI, Advanced Excel, Google Analytics (GA4), n8n, Microsoft Power Automate, Looker Studio, NotebookLM, ChatGPT, Claude, Gemini, API Integrations, LLM Applications, IBM SPSS.
- **Soft Skills:** Analytical Thinking, Problem Solving, Cross-Functional Collaboration, Critical Thinking, Stakeholder Management, Communication, Project Leadership, Presentation & Workshop Facilitation.

Certifications

- Google AI Professional Certificate | Google | May 2026
- n8n Level 2: Advanced Course | n8n | May 2026
- Google Data Analytics Professional Certificate | Google | April 2024

Education

Master of Arts (MA) in Clinical Psychology Amity University	Noida, India May 2022
Bachelor of Science (BS) in Microbiology, Honors Amity University	Noida, India May 2020

Achievements & Publications

- Awarded Top Performer recognition within the team at Gartner for outstanding contributions to operational efficiency and analytical excellence.
- Publication: [Emotional Competence and Altruism among Young Adults in India](#) — International Journal of Recent Advances in Multidisciplinary Topics | *November 2022* (empirical behavioral research using quantitative methods)
